1. Company & Support Overview

1.1 Company Overview

NexaCart is an e-commerce retailer specializing in consumer electronics and lifestyle products, operating primarily in the United States, Canada, and the United Kingdom. NexaCart sells directly through its website and mobile application, and does not operate physical retail stores. NexaCart was founded in 2019 and is headquartered in Austin, Texas. This document defines the official customer support policies for NexaCart and is the authoritative source for both human support agents and the AI support agent used on NexaCart's support channels.

1.2 Products & Services

NexaCart sells the following product categories: smartphones and accessories, laptops and tablets, audio equipment (headphones, speakers, earbuds), smart home devices, wearables (smartwatches, fitness trackers), gaming peripherals, and lifestyle goods (backpacks, travel accessories, desk accessories). NexaCart also operates a subscription program called NexaPlus, described in Section 10.

1.3 Support Channels

NexaCart offers three official support channels: Website Chat (staffed by the AI support agent with human escalation), Telegram (via the official @NexaCartSupport bot, also AI-assisted with human escalation), and Email (support@nexacart.com, monitored by human agents with AI-assisted triage). Full channel-specific rules are defined in Section 14. NexaCart does not provide phone support as of the effective date of this document.

1.4 Support Hours

Website Chat and Telegram are staffed for live human escalation Monday through Saturday, 8:00 AM to 9:00 PM Eastern Time (ET). The AI agent on these channels operates 24 hours a day, 7 days a week, but can only escalate to a live human agent during the hours listed above. Email support is monitored 24 hours a day, 7 days a week, with human agents processing the queue continuously.

1.5 Response-Time Expectations

The AI agent responds to Website Chat messages within 10 seconds under normal load. The AI agent responds to Telegram messages within 60 seconds under normal load. Human agents, once escalated to, respond to Website Chat within 5 minutes during support hours and to Telegram within 30 minutes during support hours. Email receives an initial human response within 24 hours of submission, 7 days a week. These figures represent target response times, not guaranteed maximums; during periods of unusually high ticket volume (for example, major sale events), response times may be communicated as extended via a banner on the support channel.

1.6 Escalation Policy

The AI support agent must escalate a conversation to a human agent whenever a case matches one of the high-priority categories defined in Section 15.2, whenever the customer explicitly requests a human agent, or whenever the AI agent cannot resolve the customer's issue using the knowledge base and available account data after two clarifying attempts. Escalated conversations are converted into a support ticket as described in Section 16.

1.7 Customer Verification Requirements

Before disclosing order details, account details, or payment information, or before processing a cancellation, refund, return, exchange, or account change, the support agent (human or AI) must verify the customer's identity using at least two of the following: the email address associated with the NexaCart account, the order number, the last 4 digits of the payment card used, or the shipping ZIP/postal code on the order. For account security issues (Section 12), a stricter verification standard applies. If the customer cannot provide sufficient verification, the agent must decline to share account-specific information and may offer only general policy information.

1.8 General Support Principles

- Always verify identity before discussing order- or account-specific information.
- Always cite specific policy timeframes rather than giving vague answers (e.g., state "30 calendar days from delivery" rather than "soon").
- Never promise a refund, replacement, or exception that falls outside the policies in this document without human escalation.
- Always create or update a support ticket when a customer's issue requires follow-up action.
- Escalate immediately, without attempting further troubleshooting, for any case matching a P1 (Critical) priority as defined in Section 15.3.

1.9 Policy Facts at a Glance

The figures below are the single, authoritative numbers used throughout this document — every section, table, FAQ, and scenario referencing these topics is consistent with the values shown here.

RETURNS
• Standard return window: 30 calendar days from delivery (Section 6.2) • NexaPlus return window: 45 calendar days from delivery (Section 6.2, 10.2)

DAMAGED / DEFECTIVE / INCORRECT

- Reporting deadline: 48 hours from delivery (Section 8)

ORDER PROCESSING

- Standard: 1-2 business days (Section 2.3)
- NexaPlus: target of 1 business day (Section 2.3, 10.2)

SHIPPING

- Standard: 3-5 business days after processing (Section 4.1)
- Express: 1-2 business days after processing (Section 4.1)
- International: 7-12 business days after processing (Section 4.1, 4.11)

REFUNDS

- Refund initiated within 3 business days of approval (Section 5.6)
- Card appearance: typically 5-7 business days (Section 5.9)
- Digital wallet: typically 1-3 business days (Section 5.9)

RESTOCKING FEES

- 15% for opened laptops, tablets, and smart home hub devices only (Section 6.8)

NEXAPLUS

- Free trial: 14 calendar days (Section 10.4)
- Renewal grace period: 5 calendar days (Section 10.6)

ESCALATION PRIORITY LEVELS

- P1 — Critical (Section 15.3)
- P2 — High (Section 15.3)
- P3 — Normal (Section 15.3)
- P4 — Low (Section 15.3)

2. Order Policy

2.1 Placing an Order

Customers place orders exclusively through the NexaCart website (nexacart.com) or the NexaCart mobile app. Guest checkout is available and does not require account creation, but guest orders can only be tracked using the order number and the email address used at checkout. Registered accounts can view full order history under "My Orders."

2.2 Order Confirmation & Order Numbers

Upon successful checkout, the customer receives an order confirmation email within 5 minutes containing their order number. NexaCart order numbers follow the format `NXC-XXXXXXX` (the prefix "NXC-" followed by 7 digits, for example `NXC-4820193`). If a customer does not receive a confirmation email within 15 minutes, the agent should first check spam/promotions folders, then verify the order exists in the system before assuming payment failure (see Section 9.5).

2.3 Order Processing Time

Standard order processing time is 1–2 business days from the time the order is placed to the time it is handed to the carrier. Business days are Monday through Friday, excluding NexaCart-recognized holidays (New Year's Day, Memorial Day, Independence Day, Thanksgiving Day, and Christmas Day). Orders placed after 2:00 PM ET are counted as placed the following business day for processing purposes. NexaPlus subscribers (Section 10) receive priority processing with a target processing time of 1 business day; as with standard processing, this is a target rather than a guaranteed maximum.

2.4 Order Status Definitions

Status	Meaning	Customer Action
Pending	Order placed; payment authorization in progress and has not yet been confirmed.	No action needed. Typically resolves within minutes; contact support if unresolved after 2 hours.
Confirmed	Payment authorized successfully; order is queued for processing.	No action needed.
Processing	Order is being picked and prepared at the fulfillment center. Order can no longer be freely modified (see Section 3).	Contact support immediately if a change is still needed; not guaranteed.
Packed	Items have been packed and are awaiting carrier pickup.	No action needed; cancellation no longer possible (see Section 3.4).
Shipped	Order has been handed to the carrier and a tracking number is active.	Track shipment using the provided tracking number; see Section 4.
Delivered	Carrier has marked the package as delivered.	Inspect contents; report any issue within the deadlines in Section 8.
Cancelled	Order was cancelled by the customer or by NexaCart before shipment.	Refund is automatically issued per Section 5.
Failed	Payment could not be authorized or captured, or fraud screening blocked the order.	Customer must re-attempt checkout with a valid payment method.

2.5 Backordered Products

A product is marked "Backordered" when it is temporarily out of stock but expected to be restocked. Backordered items display an estimated restock date on the product page at the time of order. Orders containing a backordered item are held in "Pending Fulfillment" status until the item is back in stock; NexaCart does not split shipments unless the customer requests it. If a backordered item does not arrive within 14 calendar days of the originally estimated restock date, the customer is automatically eligible for a full refund of that item or a substitution of equal or lesser value, at their choice, without needing to meet the standard cancellation conditions in Section 3.

KEY RULE

Orders can be freely cancelled or modified only while in "Pending" or "Confirmed" status. Once an order reaches "Processing," standard cancellation rules in Section 3 apply instead.

3. Order Modification & Cancellation

3.1 Modification Window

Orders can be modified by the customer (address, product selection, quantity, or size/color variant) only while the order status is "Pending" or "Confirmed" and within 60 minutes of order placement. Once either condition is no longer met — 60 minutes have elapsed or the order enters "Processing" status — the order is locked for modification because fulfillment has begun.

3.2 Address Changes

Address changes are permitted only within the modification window defined in Section 3.1. Once an order has entered "Processing," the shipping address cannot be changed; the agent should advise the customer to refuse the delivery or arrange redirection directly with the carrier where the carrier's service allows it. NexaCart is not responsible for packages delivered correctly to an address that can no longer be changed.

3.3 Product, Size, Color, and Quantity Changes

Product, variant (size/color), and quantity changes follow the same 60-minute / "Pending-Confirmed" window as address changes. If the new item selected has a different price than the original, the difference is charged or refunded to the original payment method immediately upon confirming the change.

3.4 Cancellation Window

Orders may be cancelled free of charge, with a full refund, while they remain in "Pending" or "Confirmed" status and within 60 minutes of order placement. Once an order enters "Processing," cancellation is no longer guaranteed and the rules in Section 3.5 apply instead. This is the same modification window used for address, product, and quantity changes in Sections 3.1–3.3. To cancel, the customer must contact support through any channel and pass identity verification (Section 1.7), or use the "Cancel Order" button in their account if still available.

3.5 Cancellation After Processing Has Begun

Once an order is in "Processing" or "Packed" status, it cannot be guaranteed to be cancelled because fulfillment is already underway. The agent may submit a best-effort cancellation request to the fulfillment center, but must inform the customer that it may not succeed and that if the order ships despite the request, standard return policy (Section 6) applies instead — the customer is not charged a restocking fee in this specific scenario since the failed cancellation was NexaCart-initiated.

3.6 Cancellation After Shipment

Orders that have already reached "Shipped" status cannot be cancelled. The customer must instead either refuse delivery (in which case the package returns to NexaCart and a full refund is issued once received, per Section 5) or accept delivery and initiate a standard return under Section 6.

3.7 Cancellation Exceptions

- Final-sale and clearance items (Section 6.9) can still be cancelled within the standard cancellation window in Section 3.4, since cancellation is distinct from return — the final-sale restriction applies only to returns after delivery.
- Personalized or custom-configured products cannot be cancelled once they enter "Processing," even if this occurs earlier than the standard 60-minute window, because personalization work begins immediately.
- Orders containing a backordered item (Section 2.5) may be cancelled at any time before the item ships, even beyond the normal 60-minute window, since fulfillment has not yet begun.

4. Shipping & Delivery Policy

4.1 Shipping Methods & Delivery Windows

Method	Delivery Window	Fee	Notes
Standard Shipping	3-5 business days after processing	\$5.99	Free on orders over \$75 pre-tax
Express Shipping	1-2 business days after processing	\$14.99	Free for active NexaPlus subscribers
International Shipping	7-12 business days after processing	\$24.99	Available to Canada and the United Kingdom only

Delivery windows are counted in business days and begin after order processing is complete (Section 2.3), not from the moment the order is placed. Delivery windows exclude weekends and NexaCart-recognized holidays listed in Section 2.3. Carriers used by NexaCart include FedEx, UPS, and DHL, assigned automatically based on destination and shipping method; customers cannot select a specific carrier.

4.2 Free Shipping Threshold

Standard shipping is free automatically at checkout when the pre-tax merchandise subtotal is \$75.00 or greater, for domestic (U.S.) orders only. This threshold does not apply to Express or International shipping fees, which are charged in addition even when the free-standard-shipping threshold is met, unless waived by NexaPlus (Section 10.5).

4.3 Tracking Numbers & Status Meanings

A tracking number is generated and emailed to the customer at the moment an order moves to "Shipped" status, along with a carrier link. Tracking statuses displayed to customers are: *Label Created* (carrier has received shipment data but not yet the package), *In Transit* (package is moving through the carrier network), *Out for Delivery* (package is on the final delivery vehicle), *Delivered*, *Delivery Attempted* (carrier attempted delivery but could not complete it), and *Exception* (an issue such as a delay, address problem, or damage was flagged by the carrier).

4.4 Delayed Shipments

A shipment is considered "delayed" if it has not arrived by 2 business days after the end of its stated delivery window. If tracking has not updated (no scan activity) for more than 5 calendar days, the agent should treat it as a potential lost shipment per Section 4.5. For delayed-but-still-moving shipments, the agent should share the current tracking status and advise the customer to allow the additional 2-day grace period before further action; NexaCart does not issue refunds or credits solely for a shipment being within this grace period.

4.5 Lost Shipments

A shipment is classified as "lost" if tracking shows no movement for more than 5 calendar days and the carrier confirms it cannot locate the package, or if the delivery window plus the 2-day delay grace period (Section 4.4) has elapsed with no "Delivered" scan and no carrier exception explaining the delay. Once confirmed lost, the customer is entitled to a full refund or a free reshipment of the same items, at their choice, with no restocking fee and no requirement to return anything (since nothing was received). This requires a carrier trace to be initiated first, which typically completes within 3-5 business days.

4.6 Damaged Shipments

If a package arrives visibly damaged, the customer should follow the Damaged Product procedure in Section 8.A, including photos of the outer packaging and the product. Visible carrier damage does not require the customer to refuse delivery, but doing so is also acceptable and results in an automatic return-to-sender process (Section 4.8).

4.7 Incorrect Delivery / Delivered But Not Received

If tracking shows "Delivered" but the customer cannot locate the package, the agent should first advise the customer to check with household members, neighbors, and any building mail/parcel room, and to wait 24 hours, as carriers occasionally mark packages delivered slightly before physical drop-off. If the package still cannot be located after 24 hours, the agent should initiate a carrier investigation. If the carrier investigation confirms non-delivery, or if 5 business days pass without resolution, the customer is entitled to a full refund or free reshipment, at their choice, handled the same as a lost shipment under Section 4.5.

4.8 Returned-to-Sender Shipments

A shipment is returned to sender when the carrier cannot complete delivery after multiple attempts (see Section 4.9) or when the customer refuses delivery. Once NexaCart receives the returned package at its fulfillment center, the agent should issue a full refund to the original payment method within 3 business days of confirmed receipt, minus the original shipping fee if one was charged (shipping fees are non-refundable in return-to-sender cases unless the cause was a NexaCart error, such as an incorrect address on the label).

4.9 Delivery Attempts

Carriers used by NexaCart (FedEx, UPS, DHL) generally attempt delivery up to 3 times before returning a package to sender, with attempts typically spaced 1 business day apart; exact behavior depends on the carrier and delivery location. Signature-required shipments (used for orders containing items valued over \$500) follow the same 3-attempt pattern before return-to-sender.

4.10 Weekends & Holidays

NexaCart's carriers do not typically deliver on Sundays; Saturday delivery availability depends on the carrier and destination. Delivery windows stated in Section 4.1 are expressed in business days and therefore already exclude weekends and the holidays listed in Section 2.3. Order processing does not occur on these dates either.

4.11 International Shipping

NexaCart currently ships internationally only to Canada and the United Kingdom. International orders may be subject to customs duties, import taxes, and brokerage fees that are the customer's responsibility and are not collected by NexaCart at checkout unless explicitly stated as "duties included" on the product page. International delivery windows (7–12 business days) can be extended by customs processing, which is outside NexaCart's control and is not treated as a "delayed shipment" under Section 4.4 unless it exceeds 20 business days total from shipment.

5. Refund Policy

5.1 Refund Eligibility

A refund is the return of money to the customer's original payment method. Customers are eligible for a refund when: they cancel an order within the cancellation window (Section 3.4), a returned item is approved after inspection (Section 6), a shipment is confirmed lost (Section 4.5) or undelivered (Section 4.7), a damaged/defective/incorrect item claim is approved (Section 8), or a duplicate or erroneous charge is confirmed (Section 9.8).

5.2 Standard Refund Window

Refund requests tied to a return must be initiated within 30 calendar days of the delivery date, matching the return window in Section 6.2. Refund requests tied to damaged, defective, or incorrect items must be reported within 48 hours of delivery per Section 8. There is no separate deadline for refunds triggered by cancellation, lost shipments, or payment errors, as these are handled at the time the underlying issue is confirmed.

5.3 Items Excluded From Refunds

- Final-sale and clearance items, once delivered and past the 60-minute/pre-processing cancellation window (see Section 3.7 and Section 6.9).
- Digital gift cards, once delivered electronically.
- Personalized or custom-configured products, except where the item arrives defective or incorrect (Section 8).
- Items returned without required proof, such as photos for damage claims, where those are specified as mandatory in Section 8.

5.4 Refund Request Process

Customers request a refund by contacting support through any channel and providing their order number. For return-based refunds, the customer must first receive return approval and a return label as described in Section 6.5 before the refund is processed. For damaged/defective/incorrect items, the customer submits photos and a description per Section 8, and the refund can be approved without requiring the item to be shipped back in cases where the item is deemed not worth reclaiming (agent discretion, typically for items under \$30 in value).

5.5 Inspection Requirements

For standard returns, the fulfillment center inspects the returned item within 3 business days of receipt to confirm it matches the stated return reason and meets the condition requirements in Section 6.3. Refunds are not released until inspection is complete, except in the low-value discretion case described in Section 5.4.

5.6 Refund Approval

Once inspection confirms eligibility (or discretion is applied for damage/defect claims), the refund is approved and initiated within 3 business days. "Initiated" means NexaCart has submitted the refund transaction to the payment processor; it does not mean the money has yet reached the customer's account (see Section 5.9 for bank processing time).

5.7 Refund Rejection

A refund/return may be rejected if: the item shows damage not consistent with the stated reason (e.g., customer-caused damage claimed as a defect), the item is missing required accessories or components (Section 6 and Section 8.E), the return window has passed, or the item is on the excluded list in Section 5.3. Rejected returns are shipped back to the customer at NexaCart's expense, and the agent must clearly explain the specific rejection reason to the customer.

5.8 Partial Refunds

Partial refunds are issued when: a restocking fee applies (Section 6.8), only some items in a multi-item order are being returned, or an item is returned with minor but genuine wear that reduces its resale value (at fulfillment center discretion, typically an additional 10% deduction beyond any restocking fee). Partial refund amounts and reasons must always be itemized to the customer.

5.9 Original Payment Method & Processing Time

All refunds are issued to the original payment method used at checkout; NexaCart cannot redirect a refund to a different card or account. Once initiated (Section 5.6), refunds to credit or debit cards typically appear within 5–7 business days, depending on the customer's bank or card issuer — this bank-side processing time is outside NexaCart's control. Refunds to digital wallets (Apple Pay, Google Pay, PayPal) typically post within 1–3 business days of initiation.

5.10 Refund Status Meanings

Status	Meaning
Requested	Customer has submitted a refund request; awaiting inspection or approval.
Approved	Refund has been approved and is queued to be initiated.
Initiated	Refund transaction has been submitted to the payment processor.
Completed	Funds have been confirmed received by the customer's bank or wallet.

Rejected	Refund request was denied; reason communicated to customer per Section 5.7.
Failed	Initiated refund could not be completed by the payment processor; see Section 5.12.

5.11 Duplicate Refunds

If a customer reports receiving a duplicate refund for the same order, the agent must verify this in the payment system, and if confirmed, notify the customer that NexaCart's billing team will reverse the duplicate amount within 5 business days. The agent must never advise a customer to keep an erroneous duplicate refund.

5.12 Failed Refunds

A refund can fail if the original card has expired or been cancelled since the purchase. In this case, the agent must escalate to the billing team (P2 priority per Section 15.3), who will contact the customer to arrange an alternative refund method, typically a bank transfer or digital wallet payout, within 5 business days of the failure being identified.

6. Return Policy

6.1 Return Eligibility

A return is the act of sending a delivered product back to NexaCart, distinct from a refund (the resulting money transaction, Section 5) and an exchange (swapping for a different item, Section 7). Most products are eligible for return within the standard return window, except items listed in Section 6.9.

6.2 Return Window

Customers may request a standard return within 30 calendar days of the delivery date shown in tracking. NexaPlus subscribers (Section 10) receive an extended return window of 45 calendar days. Return requests submitted after the applicable window has closed are not accepted, except where required by a separate policy such as Section 8 (damaged/defective/incorrect items, which use a 48-hour reporting deadline instead).

6.3 Condition Requirements

Unused Products

Unused products in original packaging with all original accessories and tags qualify for a full return with no restocking fee (except categories listed in Section 6.8).

Opened Products

Opened but undamaged products (packaging opened, product tried but not damaged) qualify for return but may be subject to the restocking fee described in Section 6.8, depending on category.

Damaged or Defective Products

Products damaged in shipping or defective on arrival are not handled under this standard return policy; they follow the procedure in Section 8, which carries no restocking fee and a shorter 48-hour reporting deadline.

Missing Accessories

Returns missing original accessories (cables, chargers, remote controls, etc.) are accepted but incur a deduction from the refund equal to NexaCart's replacement cost for the missing component, itemized to the customer before the refund is finalized.

6.4 Return Shipping & Labels

NexaCart provides a prepaid return shipping label for all approved standard returns at no cost to the customer, generated automatically once the return is approved and emailed within 1 business day. Customers must use the provided label; return shipments sent using a different method or without the NexaCart label are not eligible for the prepaid guarantee and any refund is contingent on manual confirmation of receipt.

6.5 Return Approval Process

The customer initiates a return request through their account or via support, selecting a return reason. Standard-reason returns (e.g., "no longer needed," "wrong size ordered by customer") are auto-approved instantly if within the window and category is eligible. The return label is emailed within 1 business day, and the customer has 14 calendar days from approval to ship the item back before the approval expires.

6.6 Return Inspection & Approval

Once the returned item arrives at the fulfillment center, it is inspected within 3 business days (Section 5.5) to confirm the condition matches Section 6.3. If confirmed, the refund is approved and follows the timeline in Section 5.6–5.9.

6.7 Return Rejection

Returns are rejected under the same conditions listed in Section 5.7. Common causes specific to returns include signs of use beyond "opened but undamaged" (e.g., visible wear, stains, odors) and returning a different item than what was originally purchased.

6.8 Restocking Fees

A restocking fee of 15% of the item's price applies to opened returns (Section 6.3) in the following categories only: laptops, tablets, and smart home hub devices. No restocking fee applies to unused/unopened returns in any category, to any return under Section 8 (damaged/defective/incorrect), or to opened returns in categories not listed above (smartphones, audio equipment, wearables, gaming peripherals, lifestyle goods).

6.9 Final-Sale & Clearance Products

Products explicitly marked "Final Sale" or "Clearance" on the product page at time of purchase are not eligible for return or refund once delivered, except if the item is damaged, defective, or incorrect (Section 8), in which case standard remedies still apply regardless of final-sale status. Final-sale items can still be cancelled before shipment per Section 3.7.

6.10 Personalized Products

Products that are personalized or custom-configured at the time of order (e.g., engraved items, custom laptop builds) are not eligible for standard return once production has started, but remain eligible for remedy under Section 8 if they arrive defective or incorrect.

7. Exchange Policy

7.1 Exchange Eligibility

An exchange replaces a delivered item with a different item (different size, color, or product) rather than issuing money back. Exchanges follow the same eligibility window as returns: 30 calendar days from delivery (45 for NexaPlus subscribers), and the same condition requirements in Section 6.3. Final-sale and clearance items are not eligible for exchange, consistent with Section 6.9.

7.2 Replacement Process

The customer selects "Exchange" instead of "Return" when initiating the request and specifies the desired replacement (size, color, or different product). NexaCart ships the replacement item once the original is confirmed shipped back by the customer (tracking shows carrier pickup scan), rather than waiting for full inspection, to reduce customer wait time. If the returned original later fails inspection (Section 6.6), the customer is charged for the replacement item at that point.

7.3 Size, Color, and Product Exchanges

Size and color exchanges within the same product are processed as described in Section 7.2. Exchanges for a different product entirely are also permitted within the same window, but are treated as a return-and-new-purchase: the original item's refund value is applied as store credit toward the new item, issued immediately upon carrier pickup scan.

7.4 Defective Item Replacement

Exchanges for defective items follow the accelerated procedure in Section 8.B rather than this general exchange process, and do not require the customer to wait for the original to ship back before receiving a replacement.

7.5 Unavailable Replacement

If the requested replacement (size, color, or product) is out of stock at the time of exchange approval, the agent must offer the customer a choice between: waiting for restock (with an estimated date if available), selecting a different in-stock variant, or converting the exchange to a standard refund under Section 5.

7.6 Price Differences

If the replacement item costs more than the original, the customer is charged the difference to their original payment method before the replacement ships. If the replacement costs less, the difference is refunded to the original payment method within 3 business days of the exchange being processed, per the standard refund timeline in Section 5.9.

7.7 Exchange Shipping

Exchange shipping (both the return leg and the replacement outbound leg) is free of charge to the customer, regardless of order value or NexaPlus status.

7.8 Exchange Time Limits

As with returns, the customer has 14 calendar days from exchange approval to ship the original item back using the provided label before the approval expires and must be re-initiated.

8. Damaged / Defective / Incorrect Products

All claims in this section must be reported within 48 hours of the delivery timestamp shown in tracking, except Section 8.F (products that stop working after a period of normal use), which is instead covered under the Warranty Policy (Section 11). All claims require at least one clear photo of the issue; the agent should request additional photos (packaging, shipping label, product serial number) as needed for the specific scenario below. No restocking fee ever applies to claims approved under this section.

8.A Product Damaged During Shipping

Reporting deadline: 48 hours from delivery. **Required photos:** the damaged product, the interior packaging, and the shipping box/label. **Required information:** order number and a brief description of the damage. **Replacement options:** free reshipment of the same item, shipped immediately without requiring the damaged item to be returned unless its value exceeds \$150, in which case a prepaid return label is provided and the item must ship back within 14 calendar days. **Refund option:** full refund instead of replacement, at customer's choice. **Escalation:** escalate to a human agent if the customer reports damage on 2 or more consecutive orders within 30 days (possible systemic packaging issue).

8.B Defective Product

Reporting deadline: 48 hours from delivery for dead-on-arrival items; items that develop a fault after 48 hours but within the applicable warranty period follow Section 11 instead. **Required photos:** photo or short video demonstrating the defect where possible. **Required information:** order number, product serial number if visible, and a description of the malfunction. **Replacement options:** free expedited replacement, shipped within 1 business day of approval, no return of the defective unit required for items under \$150 in value; items \$150 and over require return via prepaid label within 14 calendar days. **Refund option:** available as an alternative to replacement. **Escalation:** escalate immediately if the defect presents a safety concern (e.g., overheating, smoke, sparking) — classified P1 per Section 15.3.

8.C Wrong Product Received

Reporting deadline: 48 hours from delivery. **Required photos:** photo of the item received and its packing slip/order label. **Required information:** order number and the item actually received (name/SKU if visible). **Replacement options:** correct item shipped free of charge within 1 business day, with a prepaid label provided to return the incorrect item within 14 calendar days (no charge or restocking fee). **Refund option:** full refund available instead if the customer no longer wants the item. **Escalation:** not typically required unless combined with other unresolved issues on the same order.

8.D Missing Item

Reporting deadline: 48 hours from delivery. **Required photos:** photo of the received package contents and packing slip showing what was supposed to be included. **Required information:** order number and which specific item(s) from the order are missing. **Replacement options:** missing item shipped free of charge within 1 business day of confirmation. **Refund option:** refund for the missing item's value instead, if preferred. **Escalation:** escalate if missing items are reported on the same account 2 or more times within 60 days.

8.E Missing Accessories

Reporting deadline: 48 hours from delivery. **Required photos:** photo of all contents received laid out. **Required information:** order number and the specific accessory/accessories missing (e.g., charging cable, remote, manual). **Replacement options:** the missing accessory is shipped free of charge within 2 business days if it is stocked as a standalone part; if not stocked separately, the customer is offered a partial refund equal to the accessory's estimated value. **Escalation:** not typically required.

8.F Product That Stops Working After Use

Products that functioned normally at first but later stop working, malfunction, or fail are covered under the Warranty Policy (Section 11), not this section, provided the product is within its warranty period and the fault is not caused by accidental damage or misuse. See Section 11 for the full claims process, required proof of purchase, and repair/replacement options.

9. Payment Policy

9.1 Supported Payment Methods

NexaCart accepts Visa, Mastercard, American Express, and Discover credit and debit cards, as well as the digital wallets Apple Pay, Google Pay, and PayPal. NexaCart does not accept cryptocurrency, cash on delivery, or bank wire transfers for standard orders.

9.2 Payment Authorization

When an order is placed, NexaCart places an authorization hold on the customer's card or wallet for the full order amount; this is not yet a charge. Authorization typically completes within seconds and moves the order to "Pending" or "Confirmed" status (Section 2.4).

9.3 Payment Capture

The authorized amount is captured (actually charged) at the time the order moves to "Processing" status, not at the time of order placement. If an order is cancelled while still in "Pending" or "Confirmed" (before capture), the authorization hold is simply released by the bank, typically within 1–5 business days, and no refund is needed since no charge occurred.

9.4 Pending Payments

"Payment Pending" means the authorization is still being processed by the card network or bank and has not yet been confirmed; this is normal and typically resolves within minutes to 2 hours. If an order remains in payment-pending status for more than 2 hours, the agent should check the payment processor dashboard for a specific decline reason before advising the customer.

9.5 Failed & Declined Payments

A payment fails or is declined when the issuing bank refuses the authorization (common causes: insufficient funds, incorrect card details, bank fraud flags, or billing address mismatch — Section 9.7). The order is moved to "Failed" status (Section 2.4) and no order is created for fulfillment. The customer must re-attempt checkout, ideally with a different payment method or after contacting their bank if they believe the decline was in error. NexaCart cannot override a bank's decline decision.

9.6 Duplicate Charges

An apparent duplicate charge is most commonly a temporary authorization hold (Section 9.2) still showing alongside the actual capture (Section 9.3); holds typically drop off within 5 business days without any action needed. If both charges are confirmed as actual captures (not just a hold) by checking the payment processor, this is a genuine duplicate and the agent must escalate to billing to reverse the extra charge within 5 business days, per Section 5.11.

9.7 Billing Address Mismatch

If the billing address entered does not match the address on file with the card issuer, the transaction may be declined (Section 9.5) as a fraud-prevention measure (AVS mismatch). The agent should advise the customer to re-enter the exact billing address as it appears on their card statement, not their shipping address, if these differ.

9.8 Refunds to Cards

Refunds are always issued to the original payment method per Section 5.9. NexaCart cannot process a refund to a card that was not used for the original purchase, even if the customer requests it, due to payment security and anti-fraud requirements.

9.9 Payment Security

NexaCart does not store full card numbers; all payment processing is handled by a PCI-DSS compliant third-party payment processor. Support agents, human or AI, can view only the last 4 digits of a card on file and never have access to full card numbers, CVV codes, or stored passwords. Agents must never ask a customer to provide their full card number, CVV, or password through chat, Telegram, or email.

10. Subscription Policy — NexaPlus

10.1 Subscription Plans & Pricing

NexaPlus is NexaCart's paid membership program, available as Monthly (\$9.99/month) or Annual (\$89.99/year, equivalent to roughly \$7.50/month). Both plans include identical benefits; the Annual plan is offered at a discount for upfront commitment.

10.2 Benefits

- Free Express Shipping on all orders, with no minimum order value (Section 4.1).
- Extended return window of 45 calendar days instead of the standard 30 (Section 6.2).
- Priority order processing with a target of 1 business day instead of the standard 1-2 (Section 2.3).
- A standing 5% discount applied automatically at checkout on all non-clearance items.
- Early access to sale events, typically 24 hours before the general public.

10.3 Billing Frequency & Renewal

Monthly plans bill every 30 days from the original signup date; Annual plans bill every 365 days. Both plans renew automatically using the payment method on file unless cancelled before the renewal date (Section 10.5). Customers receive an email reminder 3 days before each renewal charge.

10.4 Trial Period

New NexaPlus subscribers receive a 14-calendar-day free trial before the first charge occurs. The trial can be cancelled at any time during the 14 days with no charge. If not cancelled, the first billing charge (Monthly or Annual, per the plan selected at signup) occurs automatically at the end of day 14. Only one free trial is permitted per customer account/household.

10.5 Cancellation

NexaPlus can be cancelled at any time through account settings or by contacting support with identity verification (Section 1.7). Cancellation stops future renewals but does not refund the current billing period — the customer retains NexaPlus benefits through the end of the period already paid for (see Section 10.7 for refund exceptions). There is no minimum commitment period beyond the current billing cycle.

10.6 Failed Renewal

If a renewal charge fails (e.g., expired card), NexaPlus enters a 5-calendar-day grace period during which benefits remain active while NexaCart retries the charge. If payment is not successfully updated and captured within the grace period, the subscription is automatically cancelled and benefits end; the customer can resubscribe at any time but will not receive a new free trial if they have used one previously (Section 10.4).

10.7 Refund Rules

NexaPlus charges are non-refundable except: (a) if cancelled within the 14-day free trial, no charge occurs at all; (b) if a customer cancels within 3 calendar days of a renewal charge and has not used any NexaPlus benefit (free express shipping, extended return, or discount) during that new billing period, a full refund of that renewal charge is issued; (c) if NexaCart made a billing error (e.g., wrong plan charged).

10.8 Upgrade & Downgrade

Customers can switch from Monthly to Annual at any time; the switch takes effect immediately, the remaining value of the Monthly period is credited pro-rata toward the Annual charge, and a new 365-day cycle begins. Switching from Annual to Monthly is only permitted to take effect at the end of the current Annual period (no pro-rated downgrade mid-cycle), to prevent loss of the annual discount already applied.

10.9 Subscription Status Definitions

Status	Meaning
Trial	Within the 14-day free trial period; no charge yet made.
Active	Subscription is paid and current; benefits are available.
Grace Period	Renewal charge failed; benefits remain active for up to 5 calendar days while payment is retried (Section 10.6).
Cancelled	Customer has cancelled; benefits remain until the end of the already-paid period, then expire.
Expired	Subscription has ended and benefits are no longer available.

11. Warranty Policy

11.1 Warranty Duration

All NexaCart-branded and third-party electronics products sold by NexaCart carry a standard manufacturer warranty of 12 months from the delivery date, covering manufacturing defects. Lifestyle goods (bags, travel accessories, desk accessories) carry a 6-month warranty against manufacturing defects. An Extended Warranty add-on is available at checkout for select electronics categories (laptops, tablets, smartphones) for an additional fee, extending coverage to 24 months total from delivery.

11.2 Eligible Products

All products sold directly by NexaCart are warranty-eligible except final-sale and clearance items explicitly marked "As-Is" on the product page at time of purchase, which carry no warranty beyond the initial 48-hour defect window in Section 8.B.

11.3 Warranty Coverage

The warranty covers manufacturing defects: components that fail under normal use due to faulty materials or workmanship, such as a battery that fails to hold charge far below its rated capacity, a screen with dead pixels present from early use, or buttons/ports that fail under normal use.

11.4 Excluded Damage

The warranty does not cover: accidental damage (drops, liquid damage, cracked screens from impact), damage from unauthorized repair or modification, normal wear and tear (e.g., battery capacity naturally declining after 12+ months of daily use), cosmetic wear that does not affect function, and damage from use inconsistent with the product's intended purpose.

11.5 Proof of Purchase

Warranty claims require the original NexaCart order number, which serves as proof of purchase; no separate receipt or registration is required since order records are retained in the customer's account indefinitely.

11.6 Warranty Claim Process

The customer contacts support with the order number, a description of the fault, and photos or video where the fault is visible. The agent verifies the product is within the warranty period defined in Section 11.1 and that the described fault is not on the exclusion list in Section 11.4. Approved claims are processed within 3 business days of submission.

11.7 Repair vs. Replacement

For most consumer electronics, NexaCart offers replacement rather than repair, since repair infrastructure is limited: a new or certified-refurbished unit of the same model (or equivalent if discontinued) is shipped free of charge within 3 business days of claim approval. For laptops and select high-value items, the customer may instead choose a mail-in repair through the manufacturer's authorized service center, with prepaid shipping both ways, typically completed within 10–15 business days.

11.8 Warranty Expiration

Once the warranty period defined in Section 11.1 (or 11.9 if extended) has elapsed, NexaCart is not obligated to provide free repair or replacement; the agent may offer a paid, out-of-warranty repair quote where available, or a discount code toward a replacement purchase, at support management's discretion.

11.9 Extended Warranty

The Extended Warranty add-on, where purchased, extends coverage from 12 to 24 months from the original delivery date for the categories listed in Section 11.1. It does not expand the scope of coverage beyond Section 11.3, and the same exclusions in Section 11.4 apply throughout the extended period.

12. Account & Security

12.1 Account Creation

Customers create an account using an email address and password, or via single sign-on with Google or Apple ID. Account creation is optional; guest checkout is available per Section 2.1.

12.2 Email Verification

New accounts must verify their email address by clicking a link sent to the provided address within 48 hours of signup. Unverified accounts can still place orders but cannot access saved payment methods or order history across sessions until verified.

12.3 Password Requirements

Passwords must be at least 10 characters and include at least one number and one letter. NexaCart does not enforce special-character requirements but recommends them. Passwords are stored using industry-standard hashing and are never visible to support agents.

12.4 Password Reset

Customers reset their password using the "Forgot Password" link, which sends a reset link to the account's verified email, valid for 60 minutes. Support agents cannot reset a password directly or view a customer's password; agents can only trigger a new reset email to be sent to the verified address on file.

12.5 Suspicious Login & Account Lock

NexaCart's system automatically locks an account after 5 consecutive failed login attempts within 30 minutes, and after unusual activity such as login from a new country combined with a payment method change. Locked accounts require identity verification beyond the standard two-factor check in Section 1.7 — specifically, government-issued photo ID verification via a secure upload link — before being unlocked. This is a P2 priority case (Section 15.3).

12.6 Changing Email or Phone Number

Customers can change their account email or phone number from account settings after verifying their current password. If a customer cannot access their account to make this change themselves, a support agent may assist only after completing enhanced verification: the two standard factors (Section 1.7) plus a matching order placed within the last 90 days.

12.7 Account Ownership Verification

For any request involving account recovery, email changes, or disputes over account ownership, the agent must confirm at least: the current (or last known) email on file, one recent order number, and the billing name on file. If these cannot be confirmed, the request must be escalated to the security team (P1 priority, Section 15.3) rather than acted upon directly.

12.8 Security Escalation

Any report of unauthorized account access, unauthorized orders placed, or suspected credential compromise must be escalated immediately as P1 (Critical) per Section 15.3, regardless of channel or time of day. The AI agent must not attempt to resolve these independently beyond initial information gathering.

13. Customer Data & Privacy

13.1 Information Used for Support

To provide support, NexaCart agents (human and AI) may access: order history, shipping and billing address (not full payment details), account email and phone number, prior support ticket history, and NexaPlus subscription status. This information is used solely to resolve the customer's current request.

13.2 Account Verification for Data Access

Before sharing any account-specific data, the standard verification in Section 1.7 applies. Requests for more sensitive changes (Section 12.6, 12.7) require the enhanced verification described there.

13.3 Communication Preferences

Customers can opt in or out of marketing emails and SMS at any time through account settings or by clicking "unsubscribe" in any marketing email. Transactional messages (order confirmations, shipping updates, security alerts) cannot be opted out of, as they are necessary for order fulfillment and account security.

13.4 Data Access Requests

Customers may request a copy of the personal data NexaCart holds about them by submitting a request through the Email channel. These requests are escalated to the Privacy team and fulfilled within 30 calendar days.

13.5 Account Deletion Requests

Customers may request account deletion via the Email channel after identity verification. Deletion requests are processed within 30 calendar days, after which the account and associated personal data are removed, except records NexaCart is required to retain for financial, tax, or legal recordkeeping purposes, which are retained separately and not accessible through the deleted account.

13.6 Privacy Escalation

Any request involving legal action, subpoenas, law-enforcement inquiries, or data breach concerns must be escalated immediately as P1 (Critical) to the Privacy/Legal team and must not be handled by the AI agent or a general support agent beyond acknowledging receipt of the request.

14. Support Channels

14.1 Website Chat

Accessible via the chat icon on any nexacart.com page or in the mobile app. Customers are first assisted by the AI support agent, which can access order and account data after verification (Section 1.7). Expected AI response time is within 10 seconds; if escalated, a human agent responds within 5 minutes during support hours (Mon–Sat, 8 AM–9 PM ET). The AI agent may request the order number, account email, or ZIP code for verification. Escalation occurs per Section 15.

14.2 Telegram

Customers message the official @NexaCartSupport bot. Functionality mirrors Website Chat: AI-first response, human escalation available during support hours. Expected AI response time is within 60 seconds; escalated human response is within 30 minutes during support hours. Because Telegram is a third-party platform, agents must independently verify identity (Section 1.7) rather than relying on the Telegram account itself as proof of identity.

14.3 Email

Customers write to support@nexacart.com. Email is monitored 24/7 by human agents, with AI-assisted triage that categorizes and routes incoming messages by topic and priority (Section 15.3) before a human agent responds. Initial response time is within 24 hours. Email is the required channel for data access requests (Section 13.4), account deletion requests (Section 13.5), and any request requiring document attachments (e.g., ID verification photos, Section 12.5).

15. AI Support & Human Escalation

15.1 When the AI Agent Should Act

Answer normally when the customer's question is answerable directly from this knowledge base and, if account-specific, identity has been verified (Section 1.7) — for example, explaining the return window or checking an order's shipping status. **Request clarification** when the request is ambiguous, such as "my order is wrong" without specifying what is wrong (Section 8 requires knowing whether the issue is damage, defect, wrong item, or missing item). **Verify customer identity** before discussing any order-, account-, or payment-specific detail, per Section 1.7 or the enhanced standard in Section 12.7 where applicable. **Retrieve company data** (order status, tracking, subscription status) as needed once identity is verified. **Consult the knowledge base** for any policy question rather than generating an answer from general knowledge, to ensure figures and timeframes are exact. **Escalate to a human** per Section 15.2 and 15.3.

15.2 Mandatory Escalation Cases

The AI agent must escalate to a human agent, regardless of confidence in its own answer, for: payment disputes and chargebacks, suspected account compromise or unauthorized access (Section 12.8), refunds that have failed twice for the same order (Section 5.12), any legal or law-enforcement request (Section 13.6), severe delivery issues affecting safety (e.g., a hazardous product malfunction, Section 8.B), any product safety complaint, and any issue the customer reports as unresolved after a prior support interaction on the same topic.

15.3 Priority Levels

Level	Definition	Examples	Target Response
P1 — Critical	Immediate risk to customer safety, security, or legal exposure.	Account compromise, safety-related product defect (overheating, sparking), legal/law-enforcement request, data breach concern.	Escalate immediately; human response within 1 hour during support hours, 4 hours overall SLA.
P2 — High	Significant customer impact requiring prompt human handling.	Failed refund (Section 5.12), locked account (Section 12.5), duplicate charge confirmed (Section 9.6).	24-hour SLA.
P3 — Normal	Standard support requests resolvable within normal timeframes.	Standard return/refund request, order status question, exchange request.	72-hour SLA.
P4 — Low	General questions with no urgency or account impact.	General policy questions, product information questions.	5-business-day SLA.

15.4 P1 Escalation Outside Live Support Hours

Website Chat and Telegram have live human escalation only Monday through Saturday, 8:00 AM to 9:00 PM ET (Section 1.4). A P1 (Critical) case reported outside these hours is not delayed until the next live-support window: the AI agent must immediately queue the case to the appropriate specialized escalation process (security, billing, or privacy/legal, per Section 15.2) exactly as it would during live hours. The case remains subject to the same overall P1 SLA — 4 hours from creation to first substantive human response — regardless of when it was reported. This does not create a new support channel; it routes the existing escalation path outside the live-chat response window defined in Section 1.5.

16. Support Ticket Policy

16.1 When a Ticket Is Created

A support ticket is automatically created whenever: a conversation is escalated to a human agent (Section 15.2), a customer submits a request via Email, or an AI-resolved conversation involves an action requiring follow-up confirmation (e.g., a refund that has been approved but not yet completed). Purely informational AI chat exchanges that fully resolve the customer's question do not generate a ticket.

16.2 Ticket IDs

Tickets are assigned an ID in the format `TCK-XXXXXX` (6 digits, e.g., `TCK-108422`), provided to the customer for reference in any follow-up communication.

16.3 Ticket Statuses

Status	Meaning
Open	Ticket created; not yet picked up by an agent.
In Progress	An agent is actively working the ticket.
Waiting for Customer	Agent has requested information and is awaiting the customer's reply.
Escalated	Ticket has been raised to a specialized team (billing, security, privacy/legal).
Resolved	The issue has been addressed; ticket will auto-close if no reply within 7 calendar days.

16.4 SLA Expectations

Each ticket's SLA is determined by its priority level as defined in Section 15.3. SLA is measured from ticket creation to first substantive human response, not to full resolution, since some cases (e.g., carrier investigations, Section 4.5) inherently take longer than the response SLA.

16.5 Ticket Reassignment & Escalation

Tickets are reassigned to specialized teams (billing, security, privacy/legal, logistics) when the issue matches that team's domain, per the mandatory escalation triggers in Section 15.2. Reassignment does not reset the SLA clock; the original creation timestamp is retained.

16.6 Reopening Tickets

A "Resolved" ticket can be reopened by the customer replying within 7 calendar days of resolution, which returns it to "In Progress" with the original priority level retained. After 7 calendar days, the ticket auto-closes and any further contact on the same issue creates a new ticket, cross-referenced to the original.

17. Frequently Asked Questions

Q1. Where is my order?

Check the tracking link in your shipping confirmation email, or view "My Orders" in your account. Tracking statuses are defined in Section 4.3. If tracking hasn't updated in more than 5 calendar days, this may be a delayed or lost shipment — see Section 4.4 and 4.5.

Q2. Can I cancel an order after it ships?

No. Once an order reaches "Shipped" status it cannot be cancelled (Section 3.6). You can refuse delivery, after which a full refund is issued once the package returns to NexaCart, or accept delivery and start a standard return (Section 6).

Q3. How long does a refund take?

Approved refunds are initiated within 3 business days of approval, then take an additional 5–7 business days to appear on a card (1–3 business days for digital wallets), per Section 5.9.

Q4. What happens if I received the wrong product?

Report it within 48 hours of delivery with a photo (Section 8.C). NexaCart ships the correct item free within 1 business day and provides a prepaid label to return the incorrect item within 14 calendar days, at no cost to you.

Q5. Can I change my delivery address?

Only while the order is in "Pending" or "Confirmed" status and within 60 minutes of placing it (Section 3.1–3.2). After that, the address cannot be changed.

Q6. What does "Payment Pending" mean?

Your payment authorization is still being processed by your bank. This is normal and usually resolves within minutes to 2 hours (Section 9.4).

Q7. Can I cancel NexaPlus?

Yes, anytime in account settings or via support. Cancellation stops future renewals but you keep benefits through the end of the period you already paid for (Section 10.5). Charges are non-refundable except in the specific cases in Section 10.7.

Q8. How do I replace a defective product?

Report it within 48 hours of delivery with a photo or video of the fault (Section 8.B). A free expedited replacement ships within 1 business day; items under \$150 don't need to be returned, items \$150+ require return via a prepaid label within 14 calendar days.

Q9. What is the standard return window?

30 calendar days from the delivery date (45 days for NexaPlus subscribers), per Section 6.2.

Q10. Do I have to pay for return shipping?

No. NexaCart provides a free prepaid return label for all approved standard returns (Section 6.4).

Q11. Is there a restocking fee?

Only for opened (not unused) returns of laptops, tablets, or smart home hub devices, at 15% of the item price (Section 6.8). No restocking fee applies to any other category, or to unused items, or to damaged/defective/incorrect claims.

Q12. Can I return a final-sale or clearance item?

No, final-sale and clearance items cannot be returned or refunded once delivered, unless the item is damaged, defective, or incorrect (Section 6.9 and Section 8).

Q13. My package shows "Delivered" but I don't have it. What do I do?

First check with household members/neighbors and building mail rooms, and wait 24 hours, as carriers sometimes scan slightly early. If it still hasn't turned up, contact support to open a carrier investigation (Section 4.7).

Q14. How much is shipping?

Standard shipping is \$5.99 (free on orders \$75+ pre-tax), Express is \$14.99 (free for NexaPlus subscribers), and International (Canada/UK only) is \$24.99 (Section 4.1–4.2).

Q15. How long does shipping take?

Standard: 3–5 business days after processing. Express: 1–2 business days after processing. International: 7–12 business days after processing. Processing itself takes 1–2 business days (1 for NexaPlus) before the order even ships (Section 2.3, 4.1).

Q16. What if my item arrives damaged?

Report it within 48 hours with photos of the product and packaging (Section 8.A). You can choose a free reshipment or a full refund; items under \$150 don't need to be returned.

Q17. Can I exchange an item for a different size or color?

Yes, within 30 days of delivery (45 for NexaPlus), at no shipping cost. The replacement ships once your original is scanned by the carrier (Section 7.2).

Q18. What payment methods do you accept?

Visa, Mastercard, American Express, Discover, plus Apple Pay, Google Pay, and PayPal (Section 9.1). No cryptocurrency, cash on delivery, or bank wire transfers.

Q19. I see two charges for one order — is that a mistake?

Usually this is a temporary authorization hold alongside the actual charge, which drops off within 5 business days on its own. If both are confirmed as real charges, it's a genuine duplicate and support will reverse it within 5 business days (Section 9.6).

Q20. What's covered under warranty?

Manufacturing defects — components that fail under normal use — for 12 months from delivery (6 months for lifestyle goods, up to 24 months with the Extended Warranty add-on). Accidental damage, liquid damage, and normal wear are not covered (Section 11.1–11.4).

Q21. How do I reset my password?

Use "Forgot Password" on the login page; a reset link is sent to your verified email and is valid for 60 minutes (Section 12.4). Support agents cannot reset passwords directly.

Q22. My account is locked. What do I do?

This happens after 5 failed login attempts or unusual account activity. You'll need to complete government ID verification via a secure link before it can be unlocked (Section 12.5); this is handled as a high-priority case.

Q23. Can support see my full card number?

No. Agents can only see the last 4 digits. NexaCart never stores full card numbers, and agents will never ask for your full card number, CVV, or password (Section 9.9).

Q24. What's the difference between a return, refund, and exchange?

A return is sending the product back; a refund is getting your money back; an exchange is swapping the product for a different one. See Sections 5, 6, and 7 respectively.

Q25. My order has a backordered item. What happens?

Your order is held until the item is back in stock and ships together, unless you request a split shipment. If it's not restocked within 14 days of the original estimate, you automatically qualify for a full refund of that item or a substitution (Section 2.5).

Q26. Can I get free shipping?

Standard shipping is automatically free on U.S. orders of \$75 or more pre-tax. NexaPlus subscribers get free Express shipping on every order regardless of value (Section 4.2, 10.2).

Q27. What if a part or accessory is missing from my order?

Report it within 48 hours with a photo of everything you received. The missing accessory ships free within 2 business days if stocked separately, or you receive a partial refund for its value if not (Section 8.E).

Q28. Do you ship internationally?

Yes, to Canada and the United Kingdom only, for \$24.99, with 7–12 business day delivery after processing. Customs duties and taxes are the customer's responsibility unless the product page states "duties included" (Section 4.11).

Q29. How do I know if my item qualifies for the NexaPlus extended return window?

If your NexaPlus subscription was active at the time your order was delivered, that order qualifies for the 45-day return window instead of the standard 30 (Section 6.2).

Q30. Can I switch from monthly to annual NexaPlus billing?

Yes, anytime — it takes effect immediately with the remaining monthly value credited toward the annual charge (Section 10.8). Switching from annual back to monthly only takes effect at the end of your current annual period.

Q31. What if my refund fails?

This usually happens if your original card has expired or been cancelled. The case is escalated to billing, who will contact you to arrange an alternative payout method within 5 business days (Section 5.12).

Q32. Is there a free trial for NexaPlus?

Yes, 14 calendar days, cancellable anytime during the trial with no charge. Only one free trial is allowed per customer (Section 10.4).

18. Policy Decision Matrix

Situation	Eligibility	Action	Timeframe	Escalation
Cancellation request	Order remains in "Pending"/"Confirmed" status AND within 60 minutes of placement (Section 3.4)	Cancel, full refund (no charge occurred yet)	Immediate	None; if already in Processing, best-effort only (Section 3.5)
Refund request (standard return)	Within 30 days of delivery (45 for NexaPlus); item meets condition rules	Approve return, issue label, inspect, refund	Refund initiated 3 business days after inspection	None unless rejected and disputed
Damaged product	Reported within 48 hours with photos	Free reshipment or refund; return only required if value ≥ \$150	Replacement ships within 1 business day	P3; escalate if repeat pattern (2+ in 30 days)
Wrong product received	Reported within 48 hours with photos	Ship correct item free; prepaid label for incorrect item	Correct item ships within 1 business day	P3
Delayed shipment	Past delivery window but within 2-day grace period	Share tracking status; advise to wait	N/A — monitor	P3; becomes lost-shipment case if grace period passes
Lost shipment	No tracking movement 5+ days, or window + grace period elapsed	Carrier trace; refund or reship, no return needed	Resolution in 3–5 business days after trace	P2
Failed payment	Any declined transaction	Customer must re-attempt with valid method	Immediate	None (bank-side decision)
Duplicate charge (confirmed)	Two actual captures verified, not just a hold	Reverse extra charge via billing team	5 business days	P2, mandatory
Subscription cancellation	Any active NexaPlus subscription	Stop future renewals; benefits continue to period end	Immediate effect on renewal; refund only per Section 10.7	None
Account compromise	Any suspected unauthorized access	Lock account, ID verification required	Immediate escalation	P1, mandatory

19. Realistic Support Scenarios

Each scenario below maps a realistic customer situation to the specific policy section that governs it, the required verification, the recommended action, the applicable timeframe, and any escalation requirement.

Scenario 1 — Order not yet shipped, customer wants a different color

- CUSTOMER SITUATION**
Customer placed order 20 minutes ago for a smartwatch in black and now wants blue instead.
- APPLICABLE POLICY**
Section 3.3 — variant changes permitted within 60 minutes / Pending-Confirmed status.
- VERIFICATION**
Standard (Section 1.7): order number + email or ZIP.
- RECOMMENDED ACTION**
Update the order to the blue variant; charge/refund any price difference immediately.
- TIMEFRAME**
Immediate.
- ESCALATION**
None required.

Scenario 2 — Customer wants to cancel a shipped order

- CUSTOMER SITUATION**
Order shows "Shipped" status; customer no longer wants the item.
- APPLICABLE POLICY**
Section 3.6 — cannot cancel after shipment.
- VERIFICATION**
Standard.
- RECOMMENDED ACTION**
Advise refusing delivery (refund on return) or accepting delivery and filing a standard return (Section 6).
- TIMEFRAME**
Refund within 3 business days of NexaCart receiving the returned package.
- ESCALATION**
None required.

Scenario 3 — Headphones arrive with a cracked case

- CUSTOMER SITUATION**
Customer reports the box was crushed and the headphone case is cracked; item delivered yesterday.
- APPLICABLE POLICY**
Section 8.A — shipping damage, reported within 48 hours.
- VERIFICATION**
Standard + photos of product and packaging.
- RECOMMENDED ACTION**
Offer free reshipment or full refund; item value is under \$150, so no return required.
- TIMEFRAME**
Replacement ships within 1 business day of approval.
- ESCALATION**
None, unless customer has had repeat damage claims.

Scenario 4 — Laptop won't turn on after 3 months

- CUSTOMER SITUATION**
Customer's laptop, purchased 3 months ago, no longer powers on despite normal use.
- APPLICABLE POLICY**
Section 11 — Warranty (within 12-month standard period; not an 8.B dead-on-arrival case since it worked initially).
- VERIFICATION**
Standard + order number as proof of purchase.
- RECOMMENDED ACTION**
Confirm fault isn't on the exclusion list (Section 11.4); offer free replacement or mail-in repair.
- TIMEFRAME**
Replacement ships within 3 business days of approval; repair 10–15 business days.
- ESCALATION**
None required unless a safety concern is present.

Scenario 5 — Customer reports account was accessed by someone else

CUSTOMER SITUATION

Customer sees an order they didn't place and a changed shipping address on file.

APPLICABLE POLICY

Section 12.8 — security escalation, P1 Critical.

VERIFICATION

Enhanced (Section 12.7): email on file, recent order, billing name.

RECOMMENDED ACTION

Escalate immediately to security team; do not attempt independent resolution.

TIMEFRAME

Human response within 1 hour during support hours.

ESCALATION

Mandatory, P1.

Scenario 6 — Tracking shows delivered, customer can't find package

CUSTOMER SITUATION

Tracking updated to "Delivered" this morning; customer checked their door and it's not there.

APPLICABLE POLICY

Section 4.7.

VERIFICATION

Standard.

RECOMMENDED ACTION

Advise checking with neighbors/household/mail room and waiting 24 hours; if unresolved, open carrier investigation.

TIMEFRAME

Refund/reship if unresolved after 24 hours + investigation, up to 5 business days total.

ESCALATION

P3, escalate to P2-style handling if investigation confirms non-delivery.

Scenario 7 — Customer wants to return an opened tablet, no longer needed

CUSTOMER SITUATION

Tablet delivered 10 days ago, opened and tested, customer decided not to keep it.

APPLICABLE POLICY

Section 6.2, 6.3, 6.8 — within 30-day window, opened condition, restocking fee category.

VERIFICATION

Standard.

RECOMMENDED ACTION

Approve return, issue prepaid label; 15% restocking fee will apply after inspection.

TIMEFRAME

Refund initiated within 3 business days of inspection.

ESCALATION

None required.

Scenario 8 — NexaPlus renewal charge failed

CUSTOMER SITUATION

Customer's card expired; annual renewal charge did not go through.

APPLICABLE POLICY

Section 10.6 — grace period.

VERIFICATION

Standard.

RECOMMENDED ACTION

Inform customer of the 5-day grace period; advise updating payment method to avoid losing benefits.

TIMEFRAME

5 calendar days before auto-cancellation.

ESCALATION

None required unless payment update fails repeatedly.

Scenario 9 — Customer received someone else's order

CUSTOMER SITUATION

Package delivered contains a different customer's items entirely.

APPLICABLE POLICY

Section 8.C — wrong product received.

VERIFICATION

Standard + photo of items and packing slip.

RECOMMENDED ACTION

Ship correct order free within 1 business day; prepaid label to return the misdelivered items.

TIMEFRAME

1 business day for correct item to ship.

ESCALATION

None required.

Scenario 10 — Customer disputes a charge with their bank (chargeback)

CUSTOMER SITUATION

Customer mentions they've already filed a chargeback with their bank for an order.

APPLICABLE POLICY

Section 15.2 — mandatory escalation, payment disputes.

VERIFICATION

Standard.

RECOMMENDED ACTION

Escalate to billing/disputes team; do not process a separate refund while a chargeback is open.

TIMEFRAME

24-hour SLA (P2).

ESCALATION

Mandatory, P2.

Scenario 11 — Backordered item delayed beyond estimate

CUSTOMER SITUATION

Item was estimated to restock 3 weeks ago; still not shipped, 16 days past that estimate.

APPLICABLE POLICY

Section 2.5 — 14-day-past-estimate threshold has been exceeded.

VERIFICATION

Standard.

RECOMMENDED ACTION

Offer full refund of that item or substitution of equal/lesser value, customer's choice.

TIMEFRAME

Immediate offer; refund per standard 3-business-day initiation if chosen.

ESCALATION

None required.

Scenario 12 — Customer wants a refund to a different card

CUSTOMER SITUATION

Customer's original card was closed; asks for refund to a new card instead.

APPLICABLE POLICY

Section 5.9, 5.12, 9.8 — refunds only to original method; failed-refund process applies.

VERIFICATION

Standard.

RECOMMENDED ACTION

Explain refunds cannot be redirected; escalate to billing to arrange alternative payout (bank transfer/wallet).

TIMEFRAME

5 business days.

ESCALATION

P2, mandatory.

Scenario 13 — Smart plug overheats and smells of burning

CUSTOMER SITUATION

Customer reports a smart plug got hot and produced a burning smell during use.

APPLICABLE POLICY

Section 8.B — safety-related defect.

VERIFICATION

Standard + photos if safely obtainable.

RECOMMENDED ACTION

Advise immediate discontinued use/unplugging; escalate as safety issue; offer immediate refund or replacement.

TIMEFRAME

Escalate immediately.

ESCALATION

P1, mandatory (safety concern).

Scenario 14 — Customer asks to delete their account and all data

CUSTOMER SITUATION

Customer no longer wants to use NexaCart and requests full account and data deletion.

APPLICABLE POLICY

Section 13.5.

VERIFICATION

Standard.

RECOMMENDED ACTION

Direct to Email channel if not already there; confirm request; escalate to Privacy team.

TIMEFRAME

30 calendar days.

ESCALATION

Routed to Privacy team; not P1 unless tied to a breach concern.

Scenario 15 — Exchange requested but replacement size out of stock

CUSTOMER SITUATION

Customer wants to exchange shoes for a larger size, but that size shows out of stock.

APPLICABLE POLICY

Section 7.5.

VERIFICATION

Standard.

RECOMMENDED ACTION

Offer to wait for restock, choose a different variant, or convert to a standard refund.

TIMEFRAME

Immediate decision; refund (if chosen) initiated within 3 business days of processing.

ESCALATION

None required.

20. Glossary

- Authorization** — A temporary hold placed on a customer's payment method for the order amount at the time of order placement, confirming funds/credit are available; not yet an actual charge (Section 9.2).
- Capture** — The point at which an authorized amount is actually charged to the customer, occurring when an order enters "Processing" status (Section 9.3).
- Refund** — The return of money to a customer's original payment method, distinct from a return or exchange (Section 5.1).
- Return** — The act of a customer sending a delivered product back to NexaCart, which may or may not result in a refund or exchange (Section 6.1).
- Exchange** — Replacing a delivered product with a different item (different size, color, or product) rather than issuing a monetary refund (Section 7.1).
- Chargeback** — A payment dispute filed by a customer directly with their bank or card issuer rather than through NexaCart support, requiring mandatory escalation to the billing/disputes team (Section 15.2).
- Pending Payment** — A payment authorization that has been submitted but not yet confirmed by the card network or bank, typically resolving within minutes to 2 hours (Section 9.4).
- Shipment** — The physical package sent to fulfill an order once it leaves NexaCart's fulfillment center, tracked via a carrier-issued tracking number (Section 4.3).
- Tracking** — The system by which a shipment's location and status are monitored from carrier pickup through delivery, using statuses defined in Section 4.3.
- Backorder** — A product temporarily out of stock but expected to be restocked, displayed with an estimated restock date (Section 2.5).
- SLA (Service Level Agreement)** — The target time within which a support ticket receives its first substantive human response, determined by priority level (Section 15.3, 16.4).
- Escalation** — The process of transferring a customer's case from the AI agent or general support to a human agent or specialized team (billing, security, privacy/legal) per Section 15.
- Ticket** — A trackable support record, identified by a `TCK-XXXXXX` ID, created when a case is escalated or requires follow-up (Section 16.1–16.2).
- Resolution** — The point at which a customer's issue has been addressed and the associated ticket is marked "Resolved," subject to reopening within 7 calendar days (Section 16.3, 16.6).
- Subscription Renewal** — The automatic recurring billing event for a NexaPlus subscription, occurring every 30 days (Monthly) or 365 days (Annual) unless cancelled beforehand (Section 10.3).
